

Guidelines to Enable JavaScript

This Guideline describes how to enable JavaScript.

The steps to enable JavaScript in Internet Explorer and Netscape Navigator are as follows:

(A) Internet Explorer

1. Click the [Tools] tab; then click [Internet Options] menu item. The screen of Internet Options will be displayed at Figure 1 below.
2. Click the [Security] tab; then click [Internet] icon and the [Custom Level] button to check the security setting. The screen of Security Setting will be displayed at Figure 2 below

Figure 1

3. Scroll to the [Scripting] heading in the settings.
4. Click the [Enable] option under "Active scripting" and "Scripting of Java applets".

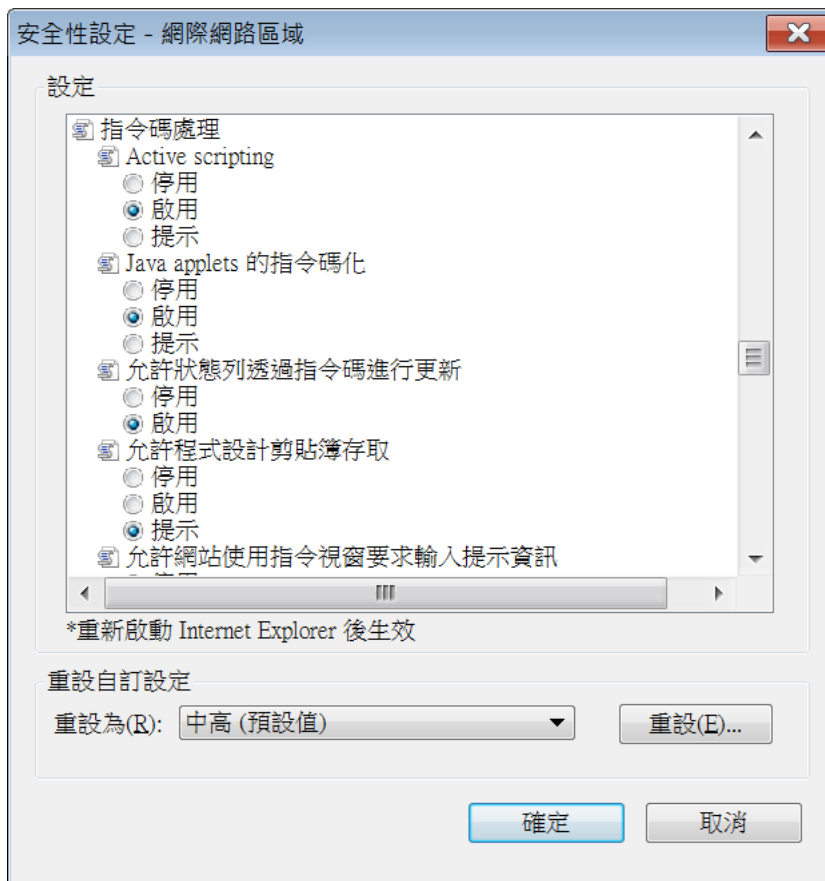

Figure 2

(B) Netscape Navigator

1. Click the [Edit] tab; then click [Preferences] menu item. The screen of Preferences will be displayed at Figure 3 below.
2. Select [Advanced] from the Category
3. Click [Enable JavaScript] check box.
